

Local FDC

- "Information Model for Avoiding Wasting Time and Energy in Detours around Hole Areas in Wireless Sensor Networks", granted by Local FDC grants 2007-2008.
- "Acquisition of the Support for the Research and Education on Unified Modeling Language (UML) at WCU", Local FDC grants, 2005-2006.

CASSDA

- "A Mobility Control Scheme for Complete Coverage in Wireless Sensor Networks", granted by CASSDA 2007.
- "An information model for high assurance in network communication", CASSDA 2003.

Others

- "Acquisition of the graduate assistant for an interdisciplinary research and education project", granted by CAS the Dean's office, August 2010.
- "A novel teaching model for computer training", granted by the President's office, November, 2010.
- "An efficient teaching model for computer training", granted by CAS the Dean's office, December, 2010.
- "Information model for avoiding wasting time and energy in detours around hole areas in wireless sensor network", Provost Office special matching grant, 2008.
- "Computer Science Training for Gifted Middle School Students", supported by Summer Academy for Gifted Children Committee, 2006-present
- "UML Training at Jiangxi Normal University", granted by Information on WCU International Collaborative Sponsored Research Program, 2005.
- "An Information Model for High Assurance in Network Communication", supported by WCU New Faculty Development Grant 2003.
